SHOWSTOPPING SPORTS LIGHTING

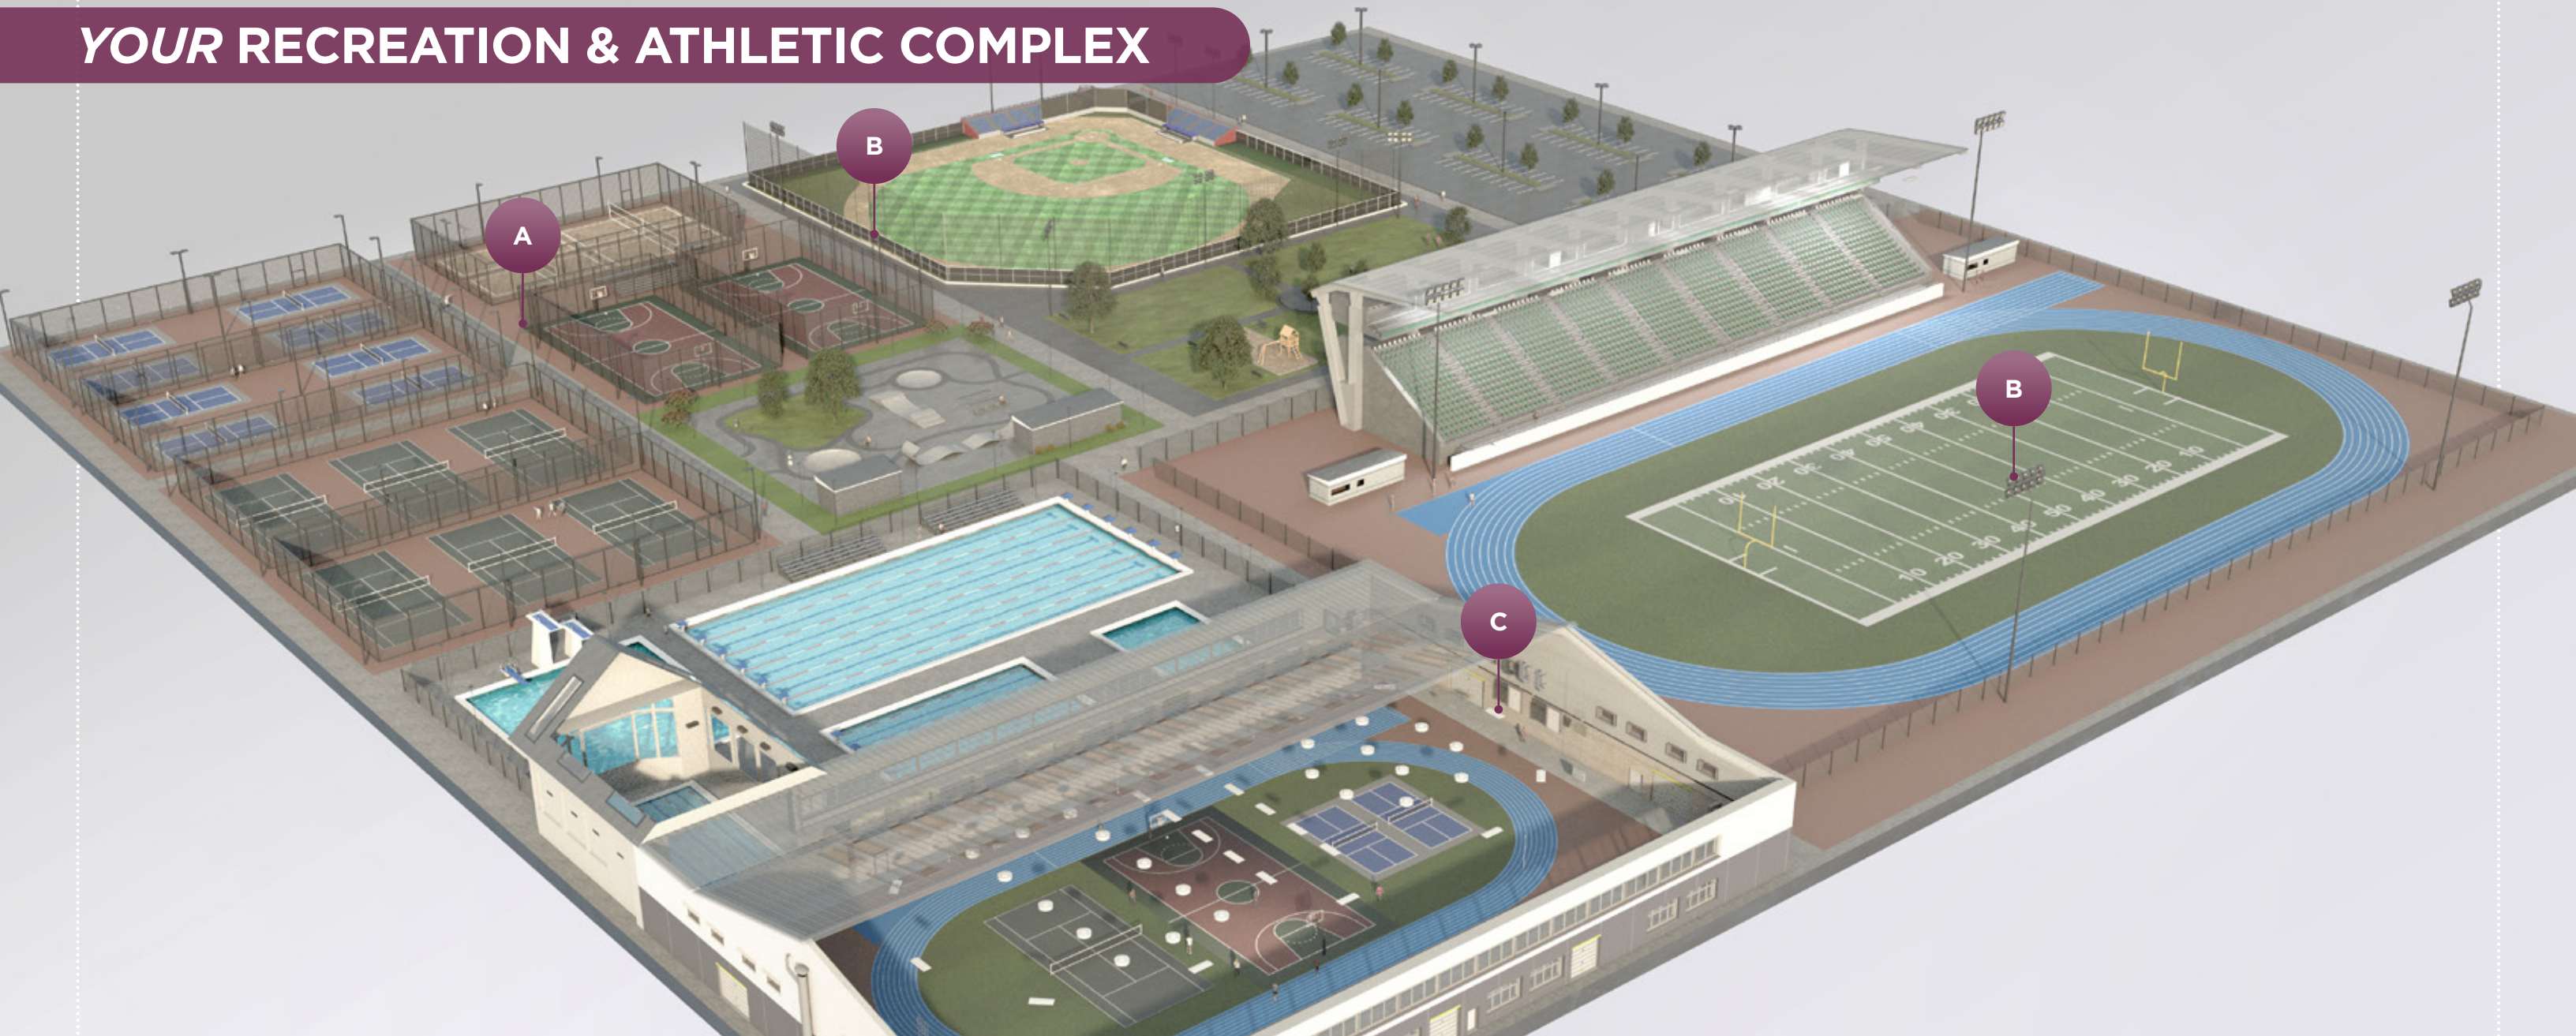

LSI Sports Lighting has been illuminating athletic complexes all over North America for nearly 50 years. Our expertly engineered LED fixtures and sports optics are designed for players and fans alike. With contemporary design aesthetics, our fixtures complement a variety of venues, but they should be the least noticeable thing on gameday, allowing players to focus on the game and fans to focus on the experience.

That means advanced glare and spill control, uniform light distribution, low-maintenance design, greater energy efficiency, and the ability to seamlessly manage every fixture from anywhere, maximizing energy efficiency and fixture life.

Manufactured in the U.S., LSI Sports Lighting offers a diverse lineup of state-of-the-art solutions that meet all these requirements. Don't get left in the dark. Elevate your venue with LSI Sports Lighting!

YOUR RECREATION & ATHLETIC COMPLEX

WHAT IS AN ATHLETIC COMPLEX?

It could simply be a neighborhood little league field. Maybe it's a community recreation center, or a high school with football and soccer fields, pickleball and basketball courts, and an ice rink. Indoors or out, LSI Sports Lighting offers the most comprehensive solution for your venue.

A OUTDOOR COURT

Our ZONE court lights feature energy efficient LEDs paired with precise silicone optics to provide superior levels of illumination only where the light is needed. Packaged in a sleek, low profile housing, the ZONE court lineup features a variety of fixture sizes, lumen options, and more to suit every court application.

B OUTDOOR FIELD

Ideal for a variety of field and stadium applications, our ZONE Sports Flood brings powerful illumination with state-of-the-art sports optics. With four distribution options, aiming guides, yoke mounting, and much more, this ruggedly modern fixture will perform at its peak for years to come.

C INDOOR COURT

With our wide selection of ZONE indoor sports lighting fixtures, there's a solution for every application. Numerous form factors, mounting options, lumen outputs, and more provide an abundance of options for every indoor sports and recreation facility.

INDUSTRY EXPERTISE

LSI is the leader in sports lighting solutions. We've been illuminating athletic courts and fields around the country for more than 40 years, continually innovating to improve athletic and recreation facilities while enhancing the experience of players and fans. Our sports lighting roster is the industry standard, with expertly designed LEDs and optics engineered to produce superior and consistent levels of illumination while maximizing energy efficiency.

THE COMPLETE SOLUTION

Thanks to our in-house technical design services group, our expertise doesn't stop at production. Using the most advanced tools on the market, our group of technical design experts create custom photometric renderings so you can see light levels before construction even begins.

With LSI Pro, our exclusive network of certified contractors, you can be assured of a quality installation from start to finish.

Headquartered in Cincinnati, our sports fixtures are manufactured in the U.S. to meet Buy American Act requirements, an especially important consideration for public facilities.

Expert contractors who know our products inside and out.

OUTDOOR

The lighting at a sports venue is every bit as important as the surface the sport is played on. Without exterior lighting, there would be no weeknight practices, no Saturday night games, and of course no Friday night lights.

LSI's dynamic lineup of outdoor sports luminaires has a solution for every application, from the fields to the courts, the offbeat skate park, and just about everything else*. Rather than take a one-size-fits-all approach, our outdoor fixtures are available in a variety of sizes, with custom optics, lumen packages, and more. Additionally, our technical design team will manage the lighting layout for any project, free of charge.

DESIGNED FOR PLAYERS, DESIGNED FOR FANS

Whether for practice, gameday, or recreation our lighting solutions can meet the most rigorous of regulatory requirements. Additionally, the ability to intuitively manage a complex lighting system enables us to provide comprehensive, custom solutions to a variety of venues.

That's what we do.

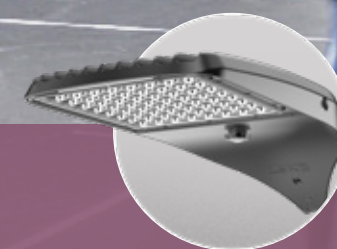

ZONE SPORTS SLICE

Sports Area & Court Light (ZNX)
30,000 - 55,000

ZONE SPORTS MEDIUM

Sports Area & Court Light (ZNM)
24,000 - 55,000

ZONE SPORTS LARGE

Sports Area & Court Light (ZNL)
50,000 - 78,000

ZONE SPORTS FLOOD

Sports Flood Light (ZNF)
70,000 - 100,000

As a leader in sports lighting for more than 40 years, we raise the industry standard.

Seamlessly integrated with any project, LSI's lighting and controls are designed to be the least noticeable thing at play, so players and spectators can stay focused on game day.

POLES & ACCESSORIES

LSI's full line of steel poles are available in a variety of shapes and heights and are fabricated with custom drill patterns and banner arm attachment options.

With optional DuraGrip® Plus coating, our poles are unmatched in their corrosion resistance and durability.

Our supplementary line of steel and aluminum brackets provide virtually limitless possibilities for fixture and accessory mounting. Whether you're simply looking for a quick install or need an easy way to retrofit something for an existing pole, we've got you covered.

CONTROLS

With our exclusive AirLink Blue Controls, you can intuitively manage any lighting system right from your iPhone or Android device, from a handful of fixtures in a single location to a few hundred covering an entire sports and recreation complex across multiple acres.

Easily integrated with any lighting project, AirLink Blue also meets the most rigorous of regulatory requirements, saving you time and money while enhancing safety and reducing energy consumption.

POLE FABRICATION

Square, round, and round tapered¹

- | | | |
|-----------------------|--------------|-----------|
| • Square ² | 4, 5, and 6" | 14' - 39' |

Wireless Control System (ALB)

- Outdoor and indoor lighting applications
- Integrated fixture sensor modules
- Bluetooth mesh network
- Web and mobile app enabled

¹ BANNER ARMS ATTACHMENT AVAILABLE FOR ALL POLES. ² DIRECT BURIAL AVAILABLE FOR SQUARE AND ROUND 4" AND 5" POLES.

INDOOR

Indoor sports lighting comes with a whole different set of considerations than outdoor. Ceiling heights can vary a great deal from one location to another, and there might be ventilation and steel beams to work around, among other things.

Whether you're lighting a multi-purpose gym, with basketball and volleyball courts, an ice rink, a fitness center, fieldhouse, or something else, LSI Sports Lighting has the solution. A variety of modular high bays, round high bays, and indirect fixtures round out the wide selection of indoor luminaires. With ample lumen and other customization options, our indoor lineup is a sure shot.

ADVANTAGE ROUND HIGH BAY
Lumen Selectable (ARB)
18,000 - 30,000

ZONE INDIRECT SPORTS LIGHT
High Output Indoor (ZNIA)
55,000 - 75,000

MODULAR HIGH BAY SERIES LIGHT
High-performance Indoor (MHB)
12,000 - 90,000

BEYOND THE GAME

From home plate to center court, LSI Sports Lighting is the preferred solution of architects and contractors alike, but what about the rest of your facility? On the court or off, from the field to the parking lot, and everywhere in between, LSI has you covered.

When the game is over, the parking lot, walkways, and other pedestrian areas should be just as inviting as the rest of the venue. In addition to creating a vibrant atmosphere that makes people want to return, quality lighting makes patrons feel safe. Make your guests feel welcome any time of day with LSI.
